

THE CYCLONE WINDMILL FORCE PUMP STANDARD.

This cut represents our new Force Pump Standard with Windmill top, polished piston rod, and all improvements needed to make up a first-class Force Pump. Having a large air chamber, it throws a steady stream through a hose. We do not hesitate to say that this pump has no superior in the market.

No. 1, 6-inch Stroke, \$12.50.
No. 2, 6-inch Stroke, \$14.00.
No. 1, 10-inch Stroke, \$14.00.
No. 2, 10-inch Stroke, \$15.00.

These prices do not include cylinder or pipe. To get price of a Pump complete, give depth of well from platform to water and depth of water in well.

Reno Manufacturing Co., Reno, Nevada.

WATER TANKS.

Redwood Water Tanks made of First Quality Redwood Lumber always in stock from 200 to 10,000 gallons. Larger sizes to order.

N. B.—As we get tanks in car lots at special rates you would throw away coin in purchasing below and paying local freights.

Reno Manufacturing Co., Reno, Nevada.

HAND OR WIND MILL LIFT PUMP.

Made in Three Sizes. Prices \$7.25 to \$9.00.
Reno Manufacturing Co., Reno, Nev.

THE CYCLONE DOUBLE PACKED CYLINDERS.

For Deep or Shallow Wells. Brass, Brass-Lined and Iron. All Sizes in Stock.
Reno Manufacturing Co., Reno, Nev.

DOUBLE ACTION FORCE PUMP.

All sizes and for any depth wells. By a change we can make in adjusting cylinders for any work, they will pump as easy as a common lift pump.

We carry a larger assortment of pumps than any concern in the State.

Reno Manufacturing Co., Reno, Nev.

MRS. DR. WINZELL, ELECTRIC PHYSICIAN.

Accademy of Science Building,
Near 4th, Room 9, San Francisco.

The scientific administration of medical electricity for Nervous Prostration, Insanity, Hysteria, Insomnia, Catarrh, Consumption, Dyspepsia, Diabetes, Malaria, Neuritis, Rheumatism, Asthma, Fevers, Hemorrhoids, and Uterine Diseases.

Electricity not only cures disease, but it consumes, expels, or burns up all drugs in the system which impair or weaken the nervous forces.

THE PALACE

—IS—
Reno's Leading Hotel.

WHY?

Because it has light sunny rooms, clean beds, and a good restaurant attached.

The old veteran, Al White, is proprietor, with A. E. Donnelly for his Manager.

What more is wanted, unless a man wants the earth?

YOU

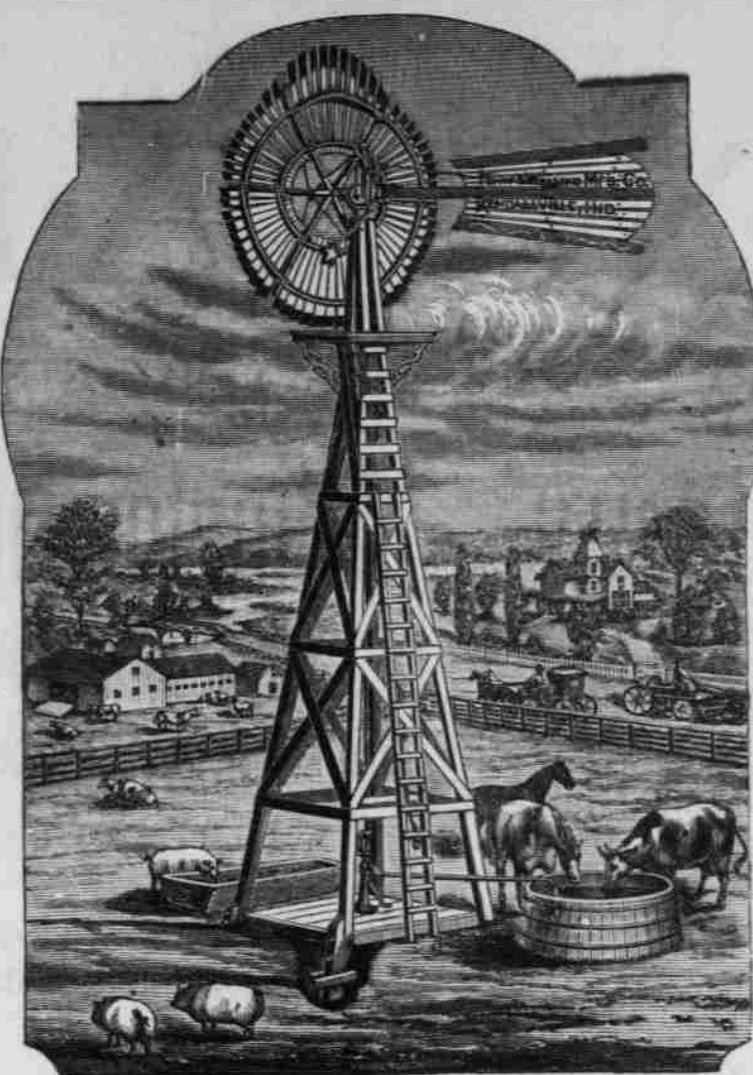

Get Fixed if you are on the Inside.

YOU

Get Soup if you are on the Outside.

YOU

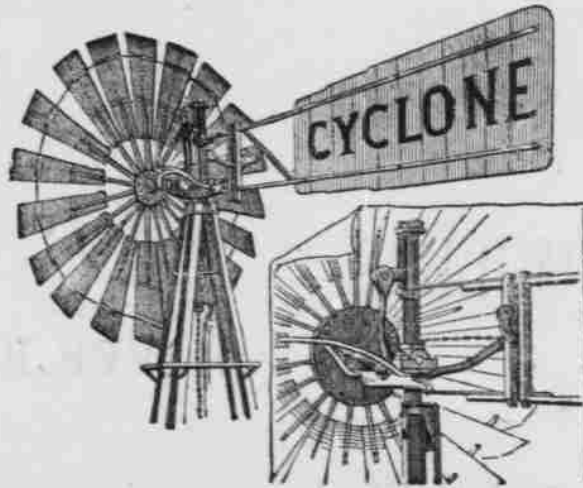

Get the Best Flour in the World at the Riverside,
Reno, Nevada.

THE STAR WINDMILL.

A few remarks may be useful to those who contemplate buying Mills, but are more or less uninformed as to the merit or demerit of the many Mills offered to the public. A RELIABLE MILL at a fair price is what the purchaser wants. A Mill sold cheap, must necessarily be made cheap; whereas a mill sold at a reasonable living price, enables the manufacturer to turn out good work. Upon application we will present you our new Special Star Mill Catalogue and Price List. We are Sole Agents for the State of Nevada.

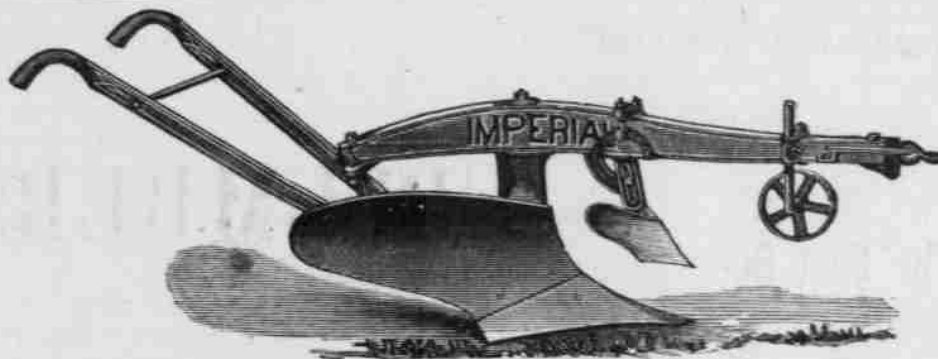

Reno Manufacturing Co., Reno, Nevada.

THE CYCLONE WINDMILL.

Fifth year in California; third year in Nevada; known as the Leading Mill on the Coast, its only competitor being the Star, and we are sole agents for both, in Nevada and Eastern California. Write for Catalogue of Prices and Capacities.

Reno Manufacturing Co., Reno, Nevada.

IMPERIAL PLOWS.

Gibbs' Imperial Plows are the Best in the Market.

THE MITCHELL WAGON.

This Well-known and Reliable Wagon has long stood the severe tests necessary to insure a good piece of work, and it stands at the head of the list to-day the world over.

There are more old Mitchell Wagons to be seen in actual use than any other make, and when replaced it is invariably with a new Mitchell.

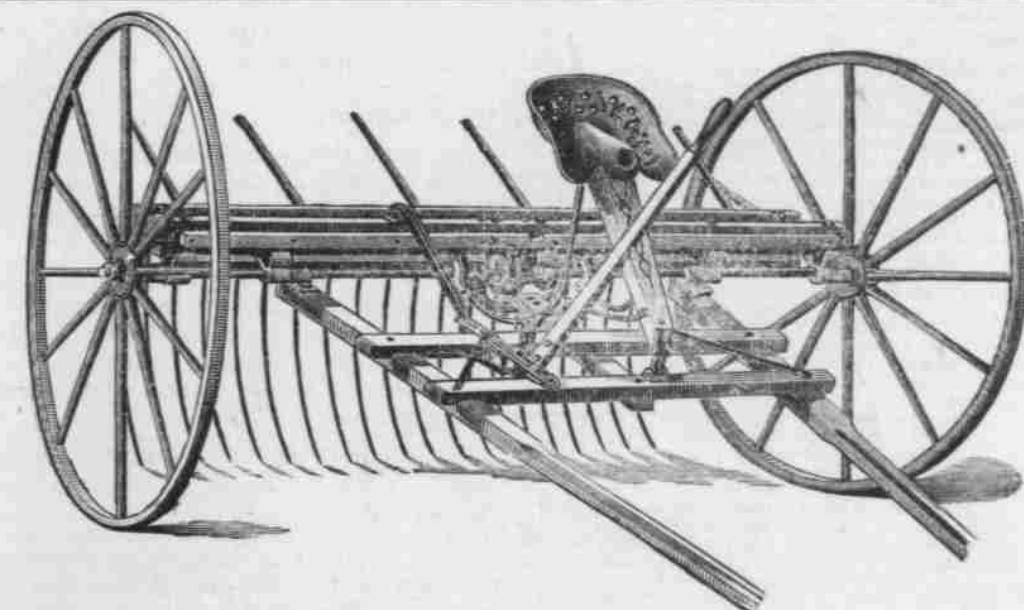

"Some may come and some may go,
But the Mitchell goes on forever."

We are sole agents for Nevada and the entire eastern strip of California.

Write us for prices—any size.

Mitchell Wagons with California Stake, Rack Bed or Double Box Beds, Steel Thimble Skeins, Concord or Solid Collar Axles or National Wrought Steel Tubular Axles, 2, 2 1/2, 2 3/4 and 3-inch Tires.

Reno Manufacturing Co., Reno, Nevada.

ROYAL SELF-DUMPING RAKE.

The Royal Self-Dumping Rake has won its way to the front ranks and is justly styled the QUEEN OF SELF-DUMP RAKES.

It is constructed on principles entirely different from other rakes. The weight of the driver assists in dumping, also relieves the teeth as they approach the ground, thereby relieving the rake of unnecessary wear, incident to the teeth striking the ground after every dumping process. A simple adjustment of the seat adapts it to use for small boy or heavy weight man.

20 Teeth and Shafts, Price \$32.50.
30 Teeth and Pole, Price \$45.00.
Steel Wheels \$2.50 extra.

WE HAVE ALL EXTRAS FOR THIS RAKE.

THE THOMAS OR IMPERIAL RAKE is another Rake perfect in every detail. It has the largest sale of any rake on earth. One that any boy can work, and no man can find fault with.

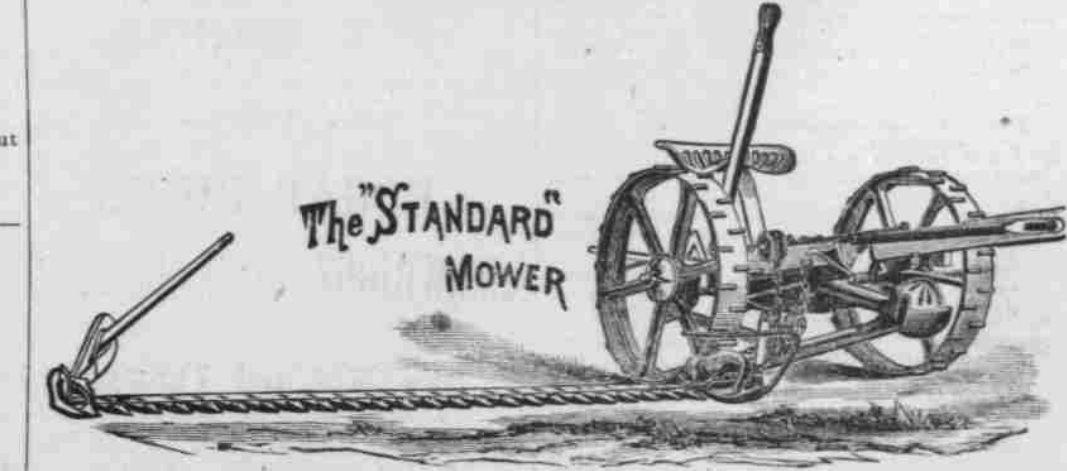

This and the Royal have been in use in Nevada, winning where all others have failed. Try it and you will keep it. Extras, etc., Price \$30.00.

Revolving Rakes, 16 Teeth, Wood Stop, \$8.00.
Our new End Lever, which is now put on all our machines—enables the driver to raise the rake with his foot, leaving the hands free to manage the team.

Lift Over Wire Rakes, 28 Teeth, Weight 28 lbs., \$14.00.

Reno Manufacturing Co., Reno, Nevada.

STANDARD MOWERS.

The Reason Why the Standard Mowers are so Successful

May be found in the fact that the Cutter-Bar does not drag on the ground, but its weight is carried on the drive wheels by means of our spring and compensating lever, giving the following advantages:

1st—By taking the weight of Cutter-Bar off the ground, side draft is avoided.

2d—By carrying nearly the whole weight of Cutter-Bar on the drive wheels, the traction of the wheels is largely increased, which gives a corresponding increase in cutting power.

3d—As the weight of the Cutter-Bar is carried by the spring and compensating lever, but slight power is required to raise the bar to pass obstructions, or to clear the cut grass in turning at the corners, and any boy capable of managing a team can handle the machine with perfect ease.

Our new End Lever—which is now put on all our machines—enables the driver to raise the rake with his foot, leaving the hands free to manage the team.

4th—The Cutter-Bar tilts easier because of its very slight pressure on the ground.

5th—The Cutter-Bar being carried by the spring so that it floats over uneven surfaces, and adjusts itself to inequalities in the ground, the Standard can be worked on very rough land or in sloughs far better than the ordinary mower.

The Bar carrying Spring is easily graduated to carry more or less of the Cutter-Bar, as circumstances may require, and the machine is so perfectly balanced there is now slight on the horses' necks. Be sure and see this machine.
